FRONTEND DEVELOPER

Highly motivated Frontend Developer with a strong command of JavaScript and TypeScript. Specializes in creating scalable web applications using React and Next.js, complemented by visually appealing UI/UX through Tailwind CSS. Experienced in backend integration with Node.js and Express . Proficient in collaborating with cross-functional teams to deliver dynamic and maintainable solutions.

PROFESSIONAL EXPERIENCE

WictroniX Infotech Pvt. Ltd.   **August 2023 - Present**
Full Stack Developer Intern
- Led frontend development of an E-commerce platform with Next.js and React, focusing on key features like dynamic product listings, cart functionality, and user authentication.
- Contributed to backend tasks through integration of RESTful APIs and server-side logic using Node.js and Express.
- Enhanced application performance and SEO through server-side rendering with Next.js and Redux.

WictroniX Infotech Pvt. Ltd.   **June 2023 - August 2023**
React.js Developer Intern
- Spearheaded the development of a dynamic E-commerce storefront using Next.js.
- Led the design and implementation of a Restaurant Management System using Next.js and Node.js.
- Collaborated effectively with cross-functional teams and managed version control via Git.

Stunhaul Pvt. Ltd.   **December 2022 - March 2023**
Frontend Developer Intern
- Developed and implemented the first functional version of Stunhaul Pvt Ltd's customized gift e-commerce platform, contributing to enhanced user experience and revenue growth.
- Designed and executed the frontend of the platform using cutting-edge technologies like React and Tailwind CSS, ensuring a visually appealing and responsive user interface.
- Demonstrated meticulous attention to detail, delivering high-quality code and ensuring seamless functionality across diverse devices and browsers

PROJECTS

Bruble: Next-Gen Messaging Platform 🔗   **September 2023**
- Developed a real-time messaging platform featuring OAuth integrations, file uploads, and various chat functionalities.
- Engineered various other functionalities like group chats, message read receipts, and user profile customisation.

Foodzie: A Food Ordering App   **May 2023 - Present**
- Co-developed a React-based food ordering app, incorporating real-time updates and online payment features.
- Engineered admin and vendor portals for streamlined management.

Car Mania: A Car Rental App 🔗   **February 2023 - April 2023**
- Developed MERN stack car rental web app with user-friendly interface using React, Redux, MongoDB, Node.js, and Express.js.
- Implemented responsive frontend design with Tailwind CSS for seamless booking experience and efficient backend functionalities.
